13. DEDUCTION FROM THE STARTING SCORE.

The deduction must be done according to the severity of the mistakes, divided into the following three categories:

○ **13.1 Small mistake (-0.1)**

A demonstration close to the perfect, a little alteration can be observed from the correct execution.

Examples:

A) Technical:

- The position of the arms is correct; the fits are not close properly.
- There is some variation in performing the same technical: the Chudan (body) level is not always the same etc.

B) Stances and positions:

The stances and positions are correct according to the prescriptions, but:

- The same stance is presented in different sizes; the difference is less than 10 degrees or 1 foot in length.
- The altitude of the similar stances differs; the difference is less than one palm.
- The kata is completed in a point different from that prescribed, but closer than 1 foot to it.

C) Style:

- Her/his countenance overacts the demonstration: overemphasizes the fighting feature of the Kata.

○ **13.2 Moderate mistake (-0.2, -0.3)**

Significant deviation from the perfect demonstration. If the mistake is closer to the “little” categories, 0.2, if to the “rough” category, 0.3 points are to be lost.

Examples:

A) Technical:

- Incorrect start and end position of the arm or leg: improper Hikite (too low).
- Punches, blocks, and strikes starting from a position in front that is required.

- Overstretched arms ending a punch.
- In the case of a punch or strike the trunk is not perpendicular to the direction of the technical but the angle does not exceed 45 degrees.
- Vice versa: in the case of a block the trunk does not turn to the required position (45 degrees).
- Visibly loose fist in Hikite.
- Improper speed of the technics (too slow or too fast).
- In the case of a kick the heel of the supporting leg is lifted.
- Visible fault in the in the execution of a stance: the difference is more than that allowed.
- Visible difference of the level of similar stances (Zenkutsu Dachi, Kiba Dachi, Kokutsu Dachi, Neko Ashi Dachi) what results in the waving of the Kata.
- The kata is completed in a place different from that prescribed, the difference exceed 1 foot.

C) Style:

- Directing of the sight does not precede the technical.
- The tempo of the Kata is not correct: too slow or too fast.
- The stretched and relaxed phase of the technical is not evident.

○ **13.3 Rough mistake (-0.5)**

Major divergence from the correct presentation.

Examples:

A) Technical:

- Altered level of a technic: Jodan (Head) kick instead of Chudan (Body).
- Keage- like (straight leg) kick instead of the prescribed (e.g. Yoko Geri – side kick with bend knee).
- Absence of Kiai.
- Overturning of the body in the end position (more than 45 degrees in the case of punch prior strike).
- Absolute absence of the turn in the case of a block.

B) Stances and positions:

- Too high stances.
- Large range in the length and altitude of the same stance.
